YESTech Expands Product Line with New HXR High Resolution X-Ray

New HXR System Features Sub-Micron Resolution.

San Clemente, CA – November 15, 2005 – YESTech, a leading supplier of automated inspection and yield enhancement systems for the electronics industry, introduced today its new YTX-3000 HXR x-ray inspection system for extremely high-resolution applications. Featuring an open-tube transmission target x-ray source with an integral high-voltage power supply and computer-controlled operation, the HXR system easily resolves sub-micron features with zoom magnifications up to 2400x. The x-ray source is designed for minimum maintenance, with an easily replaceable filament and target assembly.

“Our new YTX-3000 HXR x-ray system combines extreme high-resolution and magnification coupled with the proven power and ease of use of the YTX-3000, providing SMT and semiconductor manufacturers the most cost-effective, high-resolution x-ray inspection solution available,” said Troy Johnson, Vice President of Sales for YESTech. “The addition of the HXR to our product line continues our commitment to offer the most complete range of inspection systems to the electronics and semi manufacturing industries.”

The 3000 HXR is available with a 4 or 5 axis sample manipulator and a 15" x 20" (380 mm x 500 mm) x-y travel for samples up to 5 pounds in weight. Full 360 degrees rotation and 30 degrees of tilt are available. Computer-controlled motor drives provide a wide range of motion from ultra-slow use at high magnifications, to high speed for travel over large distances. All systems come with a unique control module and programmable motion for automated inspection.

Pricing and Availability

The YTX 300 HXR is priced with options starting at \$125k with U.S. delivery in little as two weeks. Additional product information is available by calling (949) 361-2714 or E-mailing sales@yestechinc.com.

Editor's Note

A high-resolution image of the YESTech HXR System and data sheet are available by calling (949) 715-2155 or by visiting <http://www.kreativesolution.com/YESTech-HXR.htm>.

About YESTech

Headquartered in San Clemente California, YESTech is a leading provider of automated optical and high-resolution x-ray inspection systems, with integrated yield enhancement solutions for the printed circuit board assembly and advanced semiconductor-packaging industries. Founded and managed by experienced industry experts compounded with a history of success, YESTech brings powerful and cost-effective inspection and yield enhancement solutions to the electronics market. The company has sales offices and customer support centers in North America, Asia and Europe. For more information on YESTech and its products, visit www.yestechinc.com.
