YESTech Wins 2008 Service Excellence Award for Third Consecutive Year

YESTech again recognized with Circuits Assembly's highest honors for Test and Inspection Equipment

San Clemente, CA – April 30, 2008 – YESTech, Inc., a leading provider of yield enhancement solutions for electronics manufacturers, has for the third consecutive year in a row, been awarded the coveted Service Excellence Award for 2008 from Circuits Assembly Magazine, which was announced at the 2008 APEX Expo in Las Vegas, Nevada.

Circuits Assembly has sponsored the awards program for 16 consecutive years by recognizing companies that receive the highest customer service ratings, as judged by their customers. In a ceremony at this year's APEX show, YESTech was once again acknowledged for its outstanding customer service achievements in the field of Test and Inspection Equipment.

"We are honored to once again to be recognized by our customers and Circuits Assembly Magazine", said Don Miller, YESTech's President and CEO. "Providing our customers exceptional service and support, as well as the latest inspection technologies, has always been our primary focus at YESTech. We are so pleased that these efforts have been acknowledged again this year", added Miller.

"YESTech has set the bar for service and support", said Tim Gustin, Plexus' Equipment Technician. "Any questions or problems have been addressed quickly and accurately, with little or no downtime. The F1 system we have has performed accurately and efficiently and has been a key factor in our commitment to quality. We want to congratulate them on winning this well-deserved award again this year", added Gustin.

At the APEX 2008 show, YESTech introduced several new products, including the YTX X3 3-D Automated X-Ray inspection system and the innovative new YTV B-UV Automated Conformal Coating Inspection.
